

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-22445

Stream : Unnamed Tributary Bayou Creek

Applicant : University of Southern Indiana
Steve Helfrich
8600 University Boulevard
Evansville, IN 47712-3590

Description : An earthen dam will be constructed across the to create a 5.8 acre recreational lake. The dam will be approximately 600' long and 31' high. It will have a crest elevation of 440', NGVD and a 50' top width. The embankment slopes will be 5:1 and 3:1 on the upstream and downstream faces, respectively. A 5' deep core trench with a 10' bottom width will be excavated. The principal spillway will consist of a drop box with 270' of 24" concrete pipe fitted with an anti-seep collar. The structure is designed to maintain a normal pool elevation of 434', NGVD. An emergency spillway will be constructed in the southeast abutment. It will consist of three 48" diameter pipes placed within an excavated trench., and a control elevation of 435', NGVD. Other structural features include covered decking at the entry headway to serve as an observation and fishing pier. The outer edge of the deck will extend into the lake and be supported by concrete columns spaced approximately 5' on center. Details of the project are contained in information and plans received at the Division of Water on July 2, 2003.

Location : Approximately 600' west of the east section line and 2000' north of the south section line extending 600' northeast
DOWNSTREAM: near Evansville, Perry Township, Vanderburgh County
NW¼, NE¼, SE¼, Section 31, T 6S, R 11W, West Franklin, IN-KY Quadrangle
Quad Code: 3708786
UTM Coordinates: Downstream 4200864 North, 440504 East
UPSTREAM:
UTM Coordinates: Upstream 4200894 North, 440528 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-22452

Stream : Eel River

Applicant : United Telephone Company of Indiana, Inc.
Linda Pinkerton
125 North Main Street
Sidney, OH 45365-2730

Description : A 1-3/4" ribbed inner duct and a 1-1/2" telephone cable will be placed under Eel River to replace a deteriorated section of aerial telephone cable. The directionally bored method will be used to place the duct and cable with 10' of cover beneath both the streambed and banks. The bore pits will be restored to the pre-disturbance ground contours. Details of the project are contained in information and plans received at the Division of Water on July 3, 2003.

Location : At the State Road 16 crossing of Eel River
near Roann, Paw Paw Township, Wabash County
NW¼, NW¼, NW¼, Section 2, T 28N, R 5E, Roann Quadrangle
Quad Code: 4008588
UTM Coordinates: Downstream 4529450 North, 588975 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Application # : FW-22455

Stream : Blue River

Applicant : Columbia City Parks Department
Tom Maley
1035 East State Road 205
Columbia City, IN 46725-9001

Description : A scenic overlook platform will be constructed atop the south bank of the Blue River. The structure will be 12' x 12', constructed of treated lumber with Trex decking and cantilevered to prevent contact with the river. Details of the project are contained in information and plans received at the Division of Water on July 7, 2003.

Location : On the south bank of Blue River immediately upstream of the Whitley Street streamcrossing
near Columbia City, Columbia Township, Whitley County
NW¼, NE¼, SW¼, Section 11, T 31N, R 9E, Columbia City Quadrangle
Quad Code: 4108524
UTM Coordinates: Downstream 4556650 North, 627100 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-22465

Stream : Falling Run

Applicant : City of New Albany
W Greg Lamar
311-319 West First Street
City County Building, Room 316
New Albany, IN 47150-3570

Description : A 24" diameter ductile iron pipeline will be installed at a minimum depth of 6' below the streambed and 25' below the streambanks. The directional bore construction method will be used. Details of the project are contained in information and plans received at the Division of Water on July 14, 2003.

Location : Immediately upstream of the 7th street stream crossing
DOWNSTREAM: at New Albany, New Albany Township, Floyd County

30 Day Public Notice Report

Application # : FW-22473

Stream : Indian Creek

Applicant : Kipfer & Sons Construction
Joe Kipfer
PO Box 125
Trafalgar, IN 46181-0125

Description : A proposed bridge over Indian Creek will be constructed to carry a private residence driveway. The new structure will consist of a pair of 36" x 12" footers and concrete walls 1' thick with end walls skewed at 45 degrees. The fill slopes at each end wall will be armored with riprap placed over geotextile fabric. Pre-engineered made concrete slabs, 12' wide x 20' in length will be topped with additional 4" concrete. Also, place No. 2 limestone in bed of creek and on banks to provide a temporary crossing. Details of the project are contained in information and plans received at the Division of Water on July 17, 2003.

Location : Approximately 400' downstream of the confluence of an unnamed tributary to Indian Creek
DOWNSTREAM: near Peoga, Hensley Township, Johnson County
SW¼, SW¼, SE¼, Section 24, T 11N, R 3E, Beanblossom Quadrangle
Quad Code: 3908632
UTM Coordinates: Downstream 4358275 North, 573513 East
UPSTREAM: Johnson County

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-22490

Stream : Pogues Run

Applicant : Indianapolis Department of Public Works
Sandra Shafer
640 North Sherman Drive
Indianapolis, IN 46201

Description : A flow shelf, stream bank restoration, riprap placement, a pedestrian path, a pedestrian bridge, concrete retaining walls, and a combination pedestrian-vehicular bridge will be constructed along Pogues Run at the Arsenal Technical High School site. A combined sewer consolidation line will be constructed behind the proposed retaining walls. Additional flow area will be provided by constructing a flow shelf at elevation 715.0 feet, NGVD. The flow shelf itself will vary in width from 0 to 25 feet on the east bank. Adjacent to the flow shelf, the east bank will be reconstructed at a slope of 4:1 (or a 25% grade) between elevation 715.0 feet, NGVD and elevation 720.0 feet, NGVD. A six (6) to seven (7) foot tall concrete retaining wall will be constructed along the east bank. The concrete retaining wall will be approximately 490 feet in length with a top at EL 727.0 feet, NGVD. An eight (8) foot wide pedestrian path will be located behind the proposed concrete retaining wall. Also, an existing pedestrian bridge located at the north end of the proposed concrete retaining wall and flow shelf will be removed and replaced with a combination pedestrian-vehicular bridge. The proposed combination vehicular-pedestrian bridge will be a 36-foot span by 10-foot rise CONSPAN arch, 36-feet in length. A second pedestrian bridge will be removed upstream and replaced with an equivalent structure. A second concrete retaining wall, approximately 140 feet long and seven (7) feet tall with a top at elevation 726.25 feet, NGVD, will be installed along the east bank of Pogues Run between the two (2) proposed bridges. Approximately 106 tons of riprap revetment will be installed along the streambank waterline to provide erosion control. In addition, downstream (south/southwest) of the Arsenal Technical High School site, the Dorman Street Bridge over Pogues Run will be removed. The single bridge pier and the bridge decking/roadway will be removed to improve flow capacity within the Pogues Run channel. A new single-span pedestrian bridge will be constructed along the same alignment at this site. Also, just upstream (north) of the New York Street crossing of Pogues Run, modifications will be made to the upstream 103 feet of the existing Pogues Run Box Culverts. Within the 103 feet, the wall between the twin box culverts will be removed, the inside top of the boxes will be raised 2.0 to 3.5 feet, and a 6-foot tall weir will be constructed from the north corner of the boxes to the center of the structure. Additionally, a pump chamber will be constructed along the northeast side of the box culverts so that discharges from CSO Nos. 034 and 035 can be pumped into the northern box culvert for storage then discharge to the Belmont Wastewater Treatment Plant. The pump chamber will extend 35 feet out from the existing north edge of the box culvert wall and have a bottom elevation 30 feet below the existing bottom of the box culverts. Discharges from CSO Nos. 034 and 035 will be routed to the pump chamber by a 12-foot diameter tunnel constructed under the box culverts. Details of the project are contained in

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

information received electronically at the Division of Water on July 29, 2003.

- Location : Between the New York Street crossing (downstream limit) and 10th Street crossing (upstream limit) of Pogues Run
at Indianapolis, Center Township, Marion County
Section 6, T 15N, R 4E, Indianapolis West Quadrangle
Quad Code: 3908672
- Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
- Application # : FW-22491
- Stream : Grassy Branch
- Applicant : Hamilton County Highway Department
Matt Knight
1700 South 10th Street
Noblesville, IN 46060-3835
- Description : Bridge Rehabilitation of Hamilton County Bridge # 618. The proposed work consists of replacing the concrete bridge approach slabs on both ends of the bridge. A new bridge railing with approach guardrail will be constructed along both sides of the bridge. The sidewalk on the bridge will be removed. The end bent support caps will be extended to the channel bottom and wing walls will be constructed to prohibit future erosion. Minor excavation will occur in the channel for approximately 35' under the bridge. The channel will be lined with riprap in the area of the bridge. The waterway opening at the bridge will be as large or larger than the existing conditions due to the excavation and extension of the bent caps. One-lane of traffic will be maintained on the bridge during all phases of construction. Details of the project are contained in information received electronically at the Division of Water on July 29, 2003.
